

Amazing questions of excel.

Q-1

	A
1	10
2	Text
3	
4	30

Question: What will be the result of the formula `=COUNTA(A1:A4) - COUNT(A1:A4)` ?

☒ 1

☐ 2

☐ 3

☐ 0

Q-2

Given.

	A	B
1	Yes	East
2	No	East
3	Yes	West

What will `=COUNTIFS(A1:A3, "Yes", B1:B3, "East")` return?

☐ 2

☒ 1

☐ 0

☐ 3

This seems to interesting as countifs perform operation on AND criteria both T then T.

Q-3

	A
1	Apple
2	Apricot
3	Banana
4	Avocado

Question: What does `=COUNTIF(A1:A4, "A*")` return?

☐ 4

☒ 3

☐ 2

☐ 1

Here A* means starting with a and *A means ending with a. (HERE CAPITAL SMALL DOESN'T MATTERS)

Q-4
Given:

	A
1	20
2	40
3	10
4	30

Question: What does `=MEDIAN(A1:A4)` return?

☒ 25

☐ 20

☐ 35

⋮

Correct Answer

25

Explanation

Explanation: Sorted: 10, 20, 30, 40 → $(20+30)/2 = 25$

Q-5
Given:

	A	B	C
1	East	A	100
2	West	A	200
3	East	B	150
4	East	A	50

Question: What does `=SUMIFS(C1:C4, A1:A4, "<>West", B1:B4, "A")` return?

☐ 250

☐ 300

☒ 150

☐ 200

⋮

HERE "<>WEST" means not equal to west.

Q-6
Given:

	A
1	90
2	80
3	100
4	70

Question: What is the result of `=RANK(A1,A1:A4)` ?

☐ 4

☐ 3

☒ 2

☐ 1

⋮

IT takes descending as default.

Q-7

Given:

	A
1	Row1
2	Row2
3	Row3
4	Row4

Question: What will `=MOD(ROW(A1),2)` return?

☐ 1

☐ 0

☐ 2

☒ Error

Distribution: Since you only have \$1\$ apple, you cannot give a whole apple to both people fairly. Therefore, you give **\$0\$ apples** to each person.

Leftover: Because you handed out \$0\$ apples, you are still holding onto that **\$1\$ original apple**.

Q-8

Given:

	A
1	10
2	20
3	10
4	30

Question: What is the result of `=MODE.SNGL(A1:A4)` ?

☒ 10

☐ 20

☐ 30

☐ #N/A

HERE mode and mode.sngl both are same.

Q-9

Given:

	A
1	10
2	30
3	50
4	70

Question: What does `=PERCENTILE(A1:A4,0.25)` return?

☐ 10

☐ 20

☒ 25

☐ 30

Here the percentile is calculated using excel formula `=percentile()`

Q-10

	A	B	C
1	1	Yes	100
2	0	No	200
3	1	Yes	300
4	1	No	400

Question: What will `=SUMPRODUCT((A1:A4=1)*(B1:B4="Yes")*C1:C4)` return?

☐ 700

☒ 400

☐ 300

☐ 100

Amazing Question it creates a filter than just add values of c column.

Q-11 Static value

E	F	G	H	I	J	K	L	M	N	O	P	Q	R	S
ng Hours	Errors	Productivity Rating	Status											
6.3	2.00	1.43	Satisfactory											
7.1	2.00	1.13	Satisfactory											
8.2	1.00	1.59	Satisfactory											
9.3	5.00	0.32	Needs Review											
8.7	3.00	0.69	Needs Review											
6.7	2.00	0.90	Satisfactory											
6.8	4.00	0.88	Needs Review											
8.4	1.00	1.07	Satisfactory											
8.1	3.00	1.60	Needs Review											
6.8	-	1.76	Satisfactory											

Q-12 we can directly use ">1000" or "<1000" or "<>1000" this means not equal to and "10000".

=COUNTIFS('Sales Transactions'!E2:E201,">10000",'Sales Transactions'!H2:H201,'Sales Transactions'!H2)					
B	C	D	E	F	
Questions	Assignment	Answer			
1	How many total transactions are there in the dataset?	200			
2	How many transactions were handled by "Amit"?	58			
3	How many transactions have Unit Price > ₹10,000 and Status = "Closed"?	37			

Q-13 one more amazing question countif(range,criteria=">"&average()) it means it takes greater than the average of range.

=COUNTIF('Sales Transactions'!E2:E201,">"&AVERAGE('Sales Transactions'!E2:E201))			
B	C	D	
Questions	Assignment	Answer	
1	How many total transactions are there in the dataset?	200	
2	How many transactions were handled by "Amit"?	58	
3	How many transactions have Unit Price > ₹10,000 and Status = "Closed"?	37	
4	Count the number of transactions where quantity sold was greater than 5.	94	
5	How many products were sold in the "East" region with a unit price less than ₹10,000?	23	
6	How many times was the product "Tablet" sold in the dataset?	12	
7	How many Open transactions were handled by Amit for products with Unit Price greater than ₹10,000?	42	
8	How many transactions had a unit price greater than the average unit price?	89	

Q-14 Value error (Data types are not same while calculations).

Q-16

The 'Format Cells' dialog box is open, showing the 'Number' tab. The 'Category' list on the left has 'Custom' selected. The 'Type' field contains the custom format code: ₹ #,##0.00 "paid". The 'Sample' field shows the result: ₹ 1,302.00 paid. The 'Delete' button is visible next to the 'Type' field. The background shows a table with columns: Completion Status, Rating, Institute, Mode of Learning, and Fee.

Completion Status	Rating	Institute	Mode of Learning	Fee
Completed	2.4	DataVerse	Hybrid	₹ 1,943.00
Completed	3.2	CodeCrafters	Online	₹ 1,362.00
Completed	4.4	CodeCrafters	Offline	₹ 1,700.00
Completed	2.6	EduHub	Offline	₹ 1,604.00
Completed	3.5	CodeCrafters	Online	₹ 912.00
In Progress	4.2	SkillBoost	Online	
In Progress	2.5	TechMentor	Hybrid	
In Progress	2.3	LearnX	Online	
Completed	3	TechMentor	Online	
Completed	4.9	LearnX	Online	
Completed	3.8	DataVerse	Hybrid	
Completed	1.3	DataVerse	Online	
Completed	2.9	EduHub	Online	
Completed	4.7	LearnX	Offline	
Completed	3.5	TechMentor	Online	
In Progress	4.1	DataVerse	Hybrid	
Dropped	4.5	CodeCrafters	Offline	
In Progress	2.3	EduHub	Offline	
Enrolled	2.8	LearnX	Hybrid	
Completed	1.2	TechMentor	Online	

Here # means random numbers

5. Apply a custom format to the "Course Fee" column to show values like: ₹1,200 paid.

Q-17 4. Use a thick border around rows where Completion Status is Completed.

New Formatting Rule

Select a Rule Type:

- Format all cells based on their values
- Format only cells that contain**
- Format only top or bottom ranked values
- Format only values that are above or below average
- Format only unique or duplicate values
- Use a formula to determine which cells to format

Edit the Rule Description:

Format only cells with:

Cell Value equal to Completed

Preview:

development	02 December 2025	₹ 1,900.00	paid	Enrolled	★ 4.3	CodeCrafters	Offline
Basics	03 December 2025	₹ 1,382.00	paid	Enrolled	★ 2.6	LearnX	Offline
or Business	04 December 2025	₹ 899.00	paid	Dropped	★ 3.8	LearnX	Online
development	05 December 2025	₹ 1,378.00	paid	Completed	★ 3.6	EduHub	Online
development	06 December 2025	₹ 1.416.00	paid	In Progress	★ 4.1	EduHub	Online

Q-17

Q-18

Given:

	A	B	C
1	Name	Score	Grade
2	Raj	85	B
3	Aman	90	A
4	Tina	78	C

Question: What is the result of `=INDIRECT("C3")` ?

☐ 90
☒ A
☐ Grade
☐ C

Here indirect searches as string and gives value of C3 as output.

Q-19 concatenation in vlookup

fx =VLOOKUP(B30,B20:D26,2,FALSE) & "," & VLOOKUP(B30,B20:D26,3,0)

B	C	D	E	F	G	H	I	J	K	L	M
Employee	Salary										
Ross	\$25,000										

nd the salary and department of the employee from the given dataset using the vlookup function seperated by a comma (example return-----> marketing,23000)

Name	Department	Salary
Ross	Sales	25000
Helen	Sales	30000
Tamara	Accounting	19000
Zoey	Marketing	23000
Jackson	Accounting	30000
Lehman	Sales	27000

Employee	Salary , department
Ross	Sales,25000

Q-20 same question when we do from index it makes easy but when using vlookup we make a specific table using chose and then add our output by 2 for answer.

fx =VLOOKUP(C33, CHOOSE({1,2}, 'IPL Dataset'!B2:B634, 'IPL Dataset'!A2:A634), 2, FALSE) + 2

Sr No.	Player	Price
1	Yash Dayal	3.2
2	David Miller	3
3	R. Sai Kishore	3
4	Abhinav Sadarangani	2.6

4 Write the row number of the following players from the

Sr No.	Player	Row No.
1	Wriddhiman Saha	15
2	Jayant Yadav	16
3	Vijay Shankar	17
4	Dominic Drakes	18

<< using index using vlookup>>

15
16
17
18

This is the dataset for above question.0

B3 **fx** Hardik Pandya

	A	B	C	D	E	F	G	H
1	Sr No.	Player	Base Price	TYPE	INR Cost (Cr)	Cost IN \$ (x000)	2021 Squad	Team
2	0	Rashid Khan	Draft Pick	BOWLER	15	1950	SRH	Gujarat Titans
3	1	Hardik Pandya	Draft Pick	ALL-ROUNDER	15	1950	MI	Gujarat Titans
4	2	Lockie Ferguson	2 Cr	BOWLER	10	1300	KKR	Gujarat Titans

Q-21 OFFSET FUNCTION

Offset(reference,rows,columns,height,width)

F55: Excel starts its cursor at the header cell "INR Cost (Cr)".

1: It moves down 1 row to land on Matthew Wade's price (\$2.4\$).

0: It moves 0 columns left or right (staying in column F).

5: It expands the selection downward to be 5 rows high (capturing all 5 player prices from F56 to F60).

1: It keeps the selection 1 column wide.

Formula Bar: `=SUM(OFFSET(F55, 1, 0, 5, 1))`

Worksheet: D

Write a dynamic formula using hlookup to find the type of

Player	Type
Lockie Ferguson	BOWLER

6

Player	Base Price	TYPE	INR Cost (Cr)	Cost IN \$ (x1000)
Matthew Wade	2 Cr	WICKETKEEPER	2.4	312
Alzarri Joseph	75 Lakh	BOWLER	2.4	312
Jason Roy	2 Cr	BATTER	2	260
Wriddhiman Saha	1 Cr	WICKETKEEPER	1.9	247
Jayant Yadav	1 Cr	ALL-ROUNDER	1.7	221

using offset function solve the following question.

Using offset function find the sum of all the player who sold out `F55, 1, 0,`

Q-22 Xlookup amazing question

Formula Bar: `=MAX(XLOOKUP(1,(Data!D1:D151="Hyderabad")*(Data!E1:E151="Printer"),Data!G1:G151))`

A	B	C	D	E	F	G	H	I	J
Q1. Find Employee Info by Name (XLOOKUP)									
What is the Department, City, and Total Sale of the employee named Emp_108?									
Sales Chennai 677985									
Q2. Find Price using INDEX-MATCH									
Using INDEX-MATCH, find the Unit Price of the product sold by employee E0042.									
								37766	
Q3. Find the Unit Price of the most expensive Printer sold in Hyderabad.									
								84734	84734

Here it searches 2 conditions, when both are true it returns 1 and volokup value is 1 so it Calculates max of it.

Q-23 Nested lookup and answer.

Formula Bar: `=XLOOKUP(MAX(Data!I1:I151),Data!I1:I151,Data!E1:E151,,0)" "&XLOOKUP(MAX(Data!I1:I151),Data!I1:I151,Data!B1:B151,,0)`

A	B	C	D	E	F	G	H	I	J	K
1	Q1. Find Employee Info by Name (XLOOKUP)									
2	What is the Department, City, and Total Sale of the employee named Emp_108?									
3	Sales Chennai 677985									
4	Q2. Find Price using INDEX-MATCH									
5	Using INDEX-MATCH, find the Unit Price of the product sold by employee E0042.									
6									37766	
7	Q3. Find the Unit Price of the most expensive Printer sold in Hyderabad.									
8									84734	84734
9										
10	Q4. Nested LOOKUP with MAX									
11	Who has the highest Total Sale and what Product did they sell?									
12	Mouse Emp_135									

Q-24 Here we are using to index match with large and by using & for better solution.

Clipboard	Font	Alignment	Number	Styles	Cells	Editing	Add-ins
A24							
=INDEX(Data!A1:I151,MATCH(LARGE(Data!I1:I151,5),Data!I1:I151,0),MATCH(Data!B1,Data!A1:I1,0))&" "&INDEX(Data!A1:I151,MATCH(LARGE(Data!I1:I151,5),Data!I1:I151,0),MATCH(Data!B1,Data!A1:I1,0))							
A	B	C	D	E	F	G	H
12	Mouse Emp_135						
13	Q5. Using VLOOKUP, find the Rating of employee with Employee ID "E0100"						
14							
15							
16	Q6. Using VLOOKUP, find the City of the employee with Employee ID "E0077".						
17	Bangalore						
18							
19	Q7. Using INDEX-MATCH-MATCH, find the Rating of employee with ID "E0101".						
20							
21							
22	Q8. Employee with Nth Highest Total Sale						
23	Find the Name and Employee ID of the employee with the 5th highest Total Sale using a formula (e.g., LARGE, INDEX, and MATCH).						
24	Emp_53 E0053						

Q-25 EOMONTH function stands for "End of Month"

Current month ka last date. =EOMONTH(B4,0) here b4 is date return in cell or starting date and 0 stands for current month.

And use +ve number for future and -ve number for past according to months needed.

D7	A	B	C	D	E
1	A				
2	1	Invoice Date			
3	2	12-01-2023			
4	3	25-06-2024			
5	4	30-09-2022			
6	5	15-03-2025			
7				30-06-2024	

Question 2

Easy

Max Score: 2

Given:

	A
1	Invoice Date
2	12/01/2023
3	25/06/2024
4	30/09/2022
5	15/03/2025

Question: What does =EOMONTH(A3,0) return?

☒ 30/06/2024

☐ 31/07/2024

☐ 01/07/2024

☐ 25/06/2024

Q-26

Given:

Question: What is the result of =TEXT(TODAY(),"ddd")?

=TEXT(TODAY(),"dd")			
D	E	F	G
06-2024		Tuesday	19

=TEXT(TODAY(),"ddd")				
D	E	F	G	H
06-2024		Tuesday	19	Tue

☒ Thursday

☐ 17

☐ 07

☐ 2025

Q-27 Here weekday calculates day and returns no from 1 to 7 basically 1 is Sunday 2 Monday 3 Tuesday and so on.

Question 4

Medium

Max Score: 3

Given:

	A
1	Meeting Date
2	15/08/2025

Question: What does the formula =CHOOSE(WEEKDAY(A2), "Sun", "Mon", "Tue", "Wed", "Thu", "Fri", "Sat") return?

☒ Fri

☐ Thu

☐ Sat

☐ Tue

Here it calculates and gives weekday as Friday and returns number 6 and in choose table in number 6 is Friday so answer is Friday.

Q-28 Here proper returns very first letter of words in capital in cell.

Given:

	A	B	C
1	Product	Qty	Price
2	paper sheet	1	120
3	GLUE stick	3	80
4	pEN HOLDER	2	210
5	pencil box	4	180

Question: What is the result of =PROPER(A4)?

☐ Pen holder

☒ Pen Holder

☐ PEN HOLDER

☐ pen holder

Q-29 Amazing question

Excel interface showing the formula bar with the formula `=MOD(E3-D3,1)` and a table of employee data.

ID	Name	Entry Time	Leaving Time	Working Hours
1122	Jack	08:00:00	17:00:00	09:00:00
1133	Mason	08:35:00	18:00:00	09:25:00
1144	Ellie	19:15:00	06:00:00	10:45:00
1155	Harry	08:00:00	18:30:00	10:30:00
1166	James	21:15:00	07:15:00	10:00:00
1177	William	10:00:00	20:20:00	10:20:00
1188	Oscar	07:00:00	17:00:00	10:00:00
1199	Lily	07:00:00	17:30:00	10:30:00
1100	Jessica	18:18:00	05:30:00	11:12:00
2200	Jacob	10:56:00	21:25:00	10:29:00

Ques - Please find the data of employees entry time and leaving time . You have to find the number of hours of working .

Here how we have calculated working hours.

Answer >> here we have taken 1 in mod as we have to get exact no. of hours in +ve numbers.

Q-30 Datedif function that calculates datedifference according to year,month and day.

Formula bar: `=DATEDIF(D9,TODAY(),"Y")`

ID	Name	Date of joining	Day	Month	year	Total Year in the company till date
1122	Jack	2022-02-01	Tuesday	February	2022	4
1133	Mason	2021-06-14	Monday	June	2021	4
1144	Ellie	2019-04-02	Tuesday	April	2019	7
1155	Harry	2020-08-19	Wednesday	August	2020	5
1166	James	2023-01-14	Saturday	January	2023	3
1177	William	2018-12-12	Wednesday	December	2018	7
1188	Oscar	2017-10-17	Tuesday	October	2017	8
1199	Lily	2020-02-14	Friday	February	2020	6
1100	Jessica	2022-02-24	Thursday	February	2022	4
2200	Jacob	2019-01-24	Thursday	January	2019	7

Q-31 calculate last date from 3 months

Formula bar: `=EOMONTH(C3,3)`

Name of the Employee	Date of joining	Last date of probation date
Richard Hockley	12-02-2022	31-05-2022
Natasha Austin	01-02-2022	31-05-2022
Shane Lee	14-12-2020	31-03-2021
Graham Hick	15-02-2021	31-05-2021
Gregory Simpson	16-01-2022	30-04-2022
Alfred Moyes	17-03-2022	30-06-2022
Usman Malik	19-09-2022	31-12-2022
Christina Georgino	21-09-2022	31-12-2022
Paul Orwell	19-04-2022	31-07-2022
Jonathon North	21-12-2022	31-03-2023
Mark Stevenson	22-02-2022	31-05-2022

Ques - Assume there is a company named A whose probation period is of 3 month from the date of joining . You have to find the last date of probation .

Q-32 DAYS FUNCTION CALCULATES DAYS DIFFERENCE BETWEEN YEARS.

Formula bar: `=DAYS(D3,C3)`

Name of the Employee	Date of joining	Current date	No of days in the company
Richard Hockley	12-02-2022	19-05-2026	1557

Q-33 NETWORKDAYS Function

Formula bar: `=NETWORKDAYS(F4,G4,B3:B13)`

List of Holidays	Start date	Last working date
21-Feb-2020	2020-01-01	2021-11-03
28-Mar-2020		
3-May-2020		
8-Jun-2020		
14-Jul-2020		
19-Aug-2020		
24-Sep-2020		
30-Oct-2020		
5-Dec-2020		
10-Jan-2021		
15-Feb-2021		

Find the no of working days in the company

474

Click on pivot then on pivot table analyze then on fields,items and & sets.

Then click on calculated field and enter name and formula and click ok.

Q-39 Q3. Check the "Email" and "Phone" columns (E & F):

- Ensure that all emails have a valid format (@ and .).

- Phone numbers must be exactly 10 digits long and contain only numbers.

Excel

```
=AND(ISNUMBER(FIND("@",E2)), ISNUMBER(FIND(".",E2)))
```

Excel

```
=AND(ISNUMBER(F2), LEN(F2)=10)
```

Q-40

Q4 .Ensure "Name" (Column B) is not left blank. Use a data validation rule or conditional formatting to highlight empty cells.

Q-41

Data Validation

Settings Input Message Error Alert

Validation criteria

Allow: Custom ☒ Ignore blank

Data: between

Formula: =COUNTIF(A\$2:A\$5,A2)=1

☐ Apply these changes to all other cells with the same settings

Clear All OK Cancel

Q-42

Data From Table/Range Existing Connections All Workbook Links Stocks Currencies Advanced Columns										
Get & Transform Data Queries & Connections Data Types Sort & Filter										
E16	=AND(D2>=0, D2<=1, LEFT(CELL("format", D2), 1)="P")									
A	B	C	D	E	F	G	H	I	J	K
1	Username	Password	Score	Bonus %						
2	anita123	abc@1234	85	5%						
3	rahul88	xcdnlw	104	15%

5	vinay_k	a1b2c3	50	10%						
6										
7										
8										
9										
10	Q1. Username Uniqueness- Ensure all usernames in Column A are unique.- Highlight duplicate usernames using conditional formatting.									
11	Q2. Password Length Check- In Column B, apply data validation to ensure passwords are at least 6 characters long.- Reject if shorter.									
12	Q3. Score Validation- In Column C, allow only numbers between 0 and 100.- If outside the range, show an error message.									
13	Q4. Bonus % Format- In Column D, ensure values end with a % symbol and are between 0% and 100%.- Use custom formula to validate the format and range.									
14										

Q-43 (why trim is not working here).

Creating Data Validation

Name	Sales Amount	Region
Harry	\$1,200	
Sam	\$1,400	
Lily	\$1,300	
Sarah	\$1,500	
Peter	\$1,700	
John	\$1,800	
Nathan	\$1,400	
Kimberly	\$1,300	
Mike	\$1,600	

Region

- West
- South
- East
- North

Ques - You have to apply a data validation in the yellow part from the list of region . if incase someone type something else then the window popup should say type region

Data Validation

Settings Input Message Error Alert

Validation criteria

Allow: List ☒ Ignore blank ☐ In-cell dropdown

Data: between

Source: =TRIM(\$G\$8:\$G\$11)

☐ Apply these changes to all other cells with the same settings

Clear All OK Cancel

Excel's Data Validation "List" option expects a direct string array or a native cell reference map (like a range reference). When you wrap the range in TRIM(), it converts the range into an evaluation array in memory. Excel's basic Data Validation engine doesn't know how to render an in-memory array into a clean drop-down visual menu, causing a formula error.

Q-44

Q3. Validate that the Phone Number column contains only valid phone numbers with exactly 10 numeric digits, without any special characters or spaces.

Q-45 2. Highlight sales lower than target.

A screenshot of the "New Formatting Rule" dialog box in Excel. The dialog box has a title bar with a question mark and a close button. It contains two main sections: "Select a Rule Type:" and "Edit the Rule Description:". Under "Select a Rule Type:", there are seven options, with "Use a formula to determine which cells to format" selected. Under "Edit the Rule Description:", there is a text box containing the formula `=C2<D2` and a button with an upward arrow. At the bottom, there is a "Preview:" section showing a blue box with the text "AaBbCcYyZz" and a "Format..." button. At the very bottom, there are "OK" and "Cancel" buttons.
